

# AMERICAN LEATHER®

## DOWN BLEND VS. TRILLIUM CUSHIONS

Both Down Blend and Trillium offer a soft, relaxed sit and are designed to deliver comfort, support, and a casual appearance. Each has unique characteristics to suit a variety of preferences and lifestyles.

---

### Down Blend

- Ultra-soft, "sink-in" lounge feel
  - Natural fill may not be suitable for individuals with feather sensitivities.
  - Regular maintenance is required to maintain loft.
  - Feathers may occasionally shift or poke through the fabric
  - Ideal for customers who prefer a luxurious, plush feel and are comfortable with a more relaxed, lived-in look
- 

### Trillium

- Soft, plush feel designed to closely mimic the comfort of Down Blend
  - 100% hypoallergenic, made from premium polyester microdenier (ultra-fine fibers)
  - Like all soft fills, Trillium benefits from regular fluffing to keep cushions looking their best.
  - No feather migration—cleaner, feather-free experience
  - Great for customers seeking a down-like feel in family-friendly or allergy-sensitive environments
- 

# AMERICAN LEATHER®

## Feature Comparison

Feature	Down Blend	Trillium
Fill	Foam core encased in a blend of down and feathers; back cushions include a mix of down, feathers, and fiber	Foam core encased in Trillium (premium polyester microdenier); back cushions filled entirely with Trillium
Feel	Ultra-soft, relaxed, sink-in comfort	Soft, plush, and slightly more supportive
Maintenance	Regular fluffing needed to maintain loft and appearance	Occasional to moderate fluffing needed to refresh shape and maintain appearance
Allergens	Possible—natural feather fill may affect allergy-sensitive individuals	Hypoallergenic—synthetic fill suitable for allergy-sensitive households
Feather Migration	Possible—feathers may shift or poke through over time	None—no feathers to migrate or escape
Shape Retention	Tends to lose loft over time without consistent fluffing	Holds shape reasonably well with periodic maintenance; may compress with regular use
Durability	Softest option; more prone to flattening in high-use settings	Designed for resilience and long-term comfort in active environments
Best For	Customers wanting a traditional down experience and a relaxed, casual look	Customers seeking plush, down-like comfort with hypoallergenic performance and lasting loft.
