

**BRINGING THE HIGHEST-
QUALITY SUSTAINABLE WOOD
FURNITURE IN THE WORLD, TO
YOUR OUTDOORS**

www.jensenoutdoor.com

SUSTAINABILITY · DESIGN · MATERIALS

Jensens' mission is to bring the highest-quality, sustainable wood furniture in the world, to your outdoor space. A leader in forestry stewardship & sustainability, Jensen Outdoor was among the first outdoor furniture manufacturers to receive FSC®-Certification.

Their award winning designs are dreamt up by the best and brightest minds in the industry. Each collection is tailor-made for a unique aesthetic and intended to be used in your outdoor space. With materials that embody the heirloom-quality standard, Jensen Outdoor only uses the most durable and sustainable timbers.

Each piece of outdoor wooden furniture is made from the heart of the trees harvested. This heartwood core is the most dimensionally stable and contains a significantly greater portion of the slow-growing, century-old tree. Heartwood is critical in outdoor furniture to maintain the long-term strength and integrity of the mortise and tenon joinery throughout the seasonal extremities of freeze and thaw and extended wet and dry periods.

FSC WHY IT MATTERS

The Forest Stewardship Council, FSC® was formed in 1993 with the mission to nurture responsible forestry so that both the ecosystem and people alike can thrive.

Jensen Outdoor, became certified in 1995, becoming one of the first organizations with forests in South America with 100% FSC®-Certified.

This means that the forests our Jensen wood products come from are independently inspected and verified for compliance against strict standards based on the Forest Stewardship Council's, **10 Principles of Forest Stewardship**.

- *zero deforestation - each tree is harvested responsibly to fight climate change*
- *fair wages and work environment for the indigenous peoples*
- *both native **plant and animal species are protected***
- *local communities living around and in the forest areas are **consulted and respected***

“ THE HIGHEST QUALITY SUSTAINABLE FURNITURE IN THE WORLD REQUIRES THE RIGHT MATERIALS ”

IPE WOOD

The crown jewel of timbers, Ipe is one of the densest premium hardwoods in the world. Two times harder than teak and considerably more flame and water-resistant, this fine hardwood has been the choice of top designers, upscale builders, and discerning individuals for outdoor furniture, flooring, and decking for more than a century.

The remarkable resilience of Ipe wood provides protection from damage, scuffing, cracking, and warping due to weather, wear, and time. Jensen Outdoor's Ipe timber exhibits a deep chocolate-brown grain when new that may be allowed to naturally age to an elegant silver patina or brought back to an 'as new' finish at any time. With proper care and maintenance, the strength, color, and beauty of Ipe wood can be enjoyed for a lifetime.

TEAK TIMBER

With its natural elegance, immense strength, and extraordinary durability, sustainably-sourced teak is one of the world's most sought-after tropical hardwoods for luxury outdoor furniture with a rich heritage adorning the residences of the affluent and powerful. Jensen Outdoor's Sorrento Collection brings the beauty of teak to life.

WOVEN FIBER

Made of high-density polyethylene, Viro® Fiber is completely colored throughout, smudge-proof, and resistant to the effects of significant temperature variations. How significant? Jensen Outdoor fibers are specifically designed and engineered for outdoor use; insensitive to temperature differences ranging from -90 to +175 degrees Fahrenheit. Jensen Outdoor fibers won't fade, even if exposed to extreme weather conditions during summer and winter. The fiber has been proven in laboratory tests to withstand continuous UV exposure for 3 years, far beyond the experience your furniture will have during the course of normal use.

SUNBRELLA®

Widely regarded as the crème de la crème, Sunbrella® is solution-dyed acrylic fabrics made for outdoor use. For decades, Sunbrella has been the fabric choice for Jensen Outdoor, offering the luxury of carefree comfort and distinctive style in any environment. Each solution-dyed acrylic fabric is crafted with remarkable attention to detail and designed for exceptional performance whether for indoor or outdoor use.
